Computing Intent Statement

The online world is an integral part of children's lives and will continue to be so as they develop into adulthood. We intend to provide our pupils with a breadth of experience to develop their understanding of themselves as responsible digital citizens. All children will receive specific training on internet safety throughout the academic year to support this. At Guildhall Feoffment School we intend our curriculum to be accessible to every child, whatever their background. We aim to develop their foundation skills and computing knowledge to enable children to use computing to research, plan, create, and communicate effectively. As pupils move through the school they will use computing programs, with increasing sophistication, to analyse problems and develop their computing language. Through the school curriculum children will develop a responsibility for their use of technology, confidence in using applications, resilience in solving problems and use computing creatively to complete tasks.
